Additional notes on libraries

Clément Levallois

2018-09-19

Table of Contents

1. You need an extra library not mentioned on the video.

Install this extra library from the Arduino IDE:

Select in the menu Sketch → Include Library → Manage Libraries: type SSD1306 in the search bar and find it.

> ❗ In the list of SSD1306 Libraries, make sure you install the one by **Adafruit**, not Acrobotic.

2. When installing the JSON library mentioned in the video, make sur to select version 5*.13.2*

The name of this library is "ArduinoJson". Find it from your Arduino IDE by selecting the menu: Sketch → Include Library → Manage Libraries: type ArduinoJson

Several libraries might appear, select the one by Benoît Blanchon. And clicking on the "Install" button, make sure you select version **5.13.2** in the dropdown menu. If you made a mistake and you installed another version (starting with 6...), follow the steps here to fix the mistake.

The end
